

# GUT-TREAT

## The Complete Gut Care for Peak Performance

1. Metronidazole belongs to the nitroimidazole class of antibiotics. It is bactericidal in nature & active against obligate anaerobes like Clostridium & some flagellate protozoan parasites like giardia in the gut. 2. Zn Bacitracin is branched, cyclic, decapeptide antimicrobial having broad spectrum of activity but primarily used to treat gram positive bacterial infections. It is primarily Gut acting & is very well established growth promoter in poultry. 3. Halquinol is one of the best non-specific antidiarrheal used in poultry feed. It is broad spectrum active against communally occurring bacteria, protozoa & fungi. It supports & promotes action of most of the AGP's & Anticoccidials when used in combination.

### Composition : Each Kg Contains

Zinc bacitracin ..... 100 gm  
Halquinol ..... 120 gm  
Metronidazole ..... 50 gm  
Organic Nutritive Carrier : Adjusted to 100%

### Benefits :

- 🐔 The best combination to control gut pathogens including aerobic & anaerobic bacteria and flagellate protozoans.
- 🐔 Gut treat improve FCR & weight gain in broiler
- 🐔 Gut treat is the best choice in bacterial enteritis as well as necrotic enteritis conditions
- 🐔 Gut treat is the best choice during stress situations to avoid gut health issue

### Indications :

- 🐔 Preventions & treatment of bacterial enteritis
- 🐔 As a feed additive for better weight gain & improve FCR
- 🐔 Necrotic Enteritis prevention & treatment
- 🐔 Non Specific Diarrhea

### Usage :

Broiler/Layer : 500 gm/ton if feed  
Breeder : 1 kg/ton of feed  
or as recommended by Nutritionist
